

Internal wall and ceiling systems

inspirational ideas

for renovated and new build living space

Stunning creating combining

You like to feel comfortable in the space in which you live. Your living environment creates a certain atmosphere as a result of its design. Ceiling and wall finishes play an important role alongside furnishings and floor coverings.

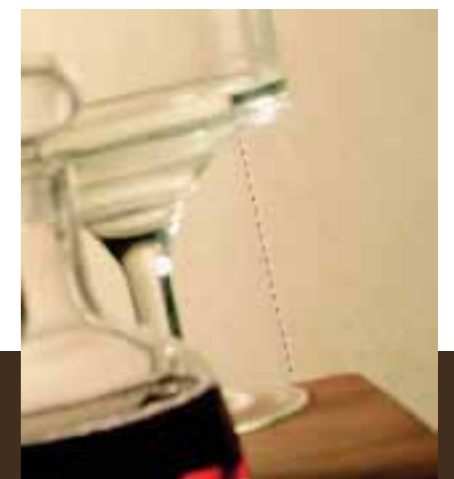

You can choose a minimalist and sleek look, or opt for a warm social atmosphere. The Deeplas Decor panels offer choices for all.

Unlimited range of possible combinations

The various ranges and finishes offer a wide selection of possibilities. By installing profiles as ceiling or wall fittings, you are opting for a very practical living space solution. Colour and shape come with low maintenance and quick installation.

This brochure provides you with a range of inspirational ideas for both newly-built as well as renovated living spaces.

installation guidelines

Panels can be fitted in two ways; (1) onto 38 x 25mm timber batten or 9050 pvc 30 x 20mm batons. (2) Directly onto the surface, ensuring it is true and sound. Fixing should be at 300mm centres. Ventilation is recommended in humid areas.

Nail or staple (staples min. H14 x B10.8mm, nails min. H16 x 10.5mm) female started edge trim section onto the baton. Trim tongue of 1st plank, fit into trim and nail or staple through the groove side flange into the baton. Fix the subsequent planks tightly joining the tongue to the groove. Clip in male starter edge trim section to finish.

Installing light fittings can be simply achieved, however, always consult a qualified electrician for the correct lighting specification and required ventilation.
